

Vikram's 23-Rule Institutional Swing Trading Framework

Tier Structure & Precedence

Tier 1 — Gates

- Role: Hard filters
- If any gate fails → trade **blocked**
- Precedence: **Highest**

Tier 2 — Core Rules

- Role: Primary scoring engine
- Generates conviction score
- Precedence: **High**

Message Copilot

Tier 3 — Enhancements

- Role: Refines signal quality
- Adds or subtracts conviction
- Precedence: **Medium**

Tier 4 — Coherence

- Role: MTF & cross-signal alignment
- Validates overall alignment
- Precedence: **Medium-Low**

Tier 5 — Strategy Selector

- Role: Picks instrument & options strategy
- Based on final conviction + IV Percentile
- Precedence: **Lowest**

! Soft Gates & Interaction Rules

- $S5 = 0 \rightarrow$ Hard block, no trade
 - $S5 = 1-3 \rightarrow$ Needs strong $S2 + S4$
 - **S4 Unswept Liquidity** $\rightarrow$ Semi-gate (wait)
 - **S6 Block/Bulk Filter** $\rightarrow$ Mandatory pre-filter
 - *(Bulk/block deals often ignored — just exchange of hands)*
 - **S3 Negative Score** $\rightarrow$ Invalidates setup
-

Key Principles

1.  Gates are non-negotiable
 2.  NSE primary source, no social sentiment
 3.  Backtest before any change
 4.  SL, entry, exit decided manually
 5.  Event calendar to be integrated
 6.  Greeks are dynamic, not predictive
 7.  Designed to detect institutional activity
-
